Subject: Fwd: Monitoring statement

Ronnie,
Here's our statement. Thanks.

Subject: Monitoring statement

Here ya go.

One of the many preparations for Hurricane Harvey included TCEQ and other monitoring entities temporarily removing approximately 75% of the stationary air monitoring equipment from the greater Houston, Corpus Christi, and Beaumont areas. Of the available air monitoring data collected from August 24-September 2, 2017, all measured concentrations were well below levels of health concern.

- More than 70% of the air monitors in Corpus Christi, Houston, and Beaumont have been re-established and are collecting data.
- TCEQ personnel are assessing monitoring stations in these areas for damage, and bringing them back online as access allows. All air monitoring stations in these areas that are accessible are expected to be back online by Friday, September 8, 2017.
